

FAQ

REFERENCES

I hate making references in ABNT style. Should I really use this standard?

Yes. The Library has prepared a [Guide](#) to facilitate the use of the standards and its team is available for any related question.

Is there any way easier when it comes to references in ABNT style?

The library has prepared the [Guide](#) “[Writing the references using the ABNT style](#)”. This guide contains information needed to build a reference for the different types of documents. It also contains examples of references.

You can find instructions to create your references list using LaTeX ([here](#)) and Microsoft Word with Mendeley ([here](#))

I have built my reference list and I'd like the Library to check if they are correct before the defense. Is it possible?

Yes. You can send it by [e-mail](#) . We will check all the references and point to the corrections needed.
